

## Clearcoats

Clearcoats are the most critical link in ensuring a finish that not only looks good from the start but retains that look for as long as possible and protects layers underneath from environmental attack. We have a strong selection of clears to suit most painting styles and conditions. Our UC-410 Medium Solids Polyurethane Clear is a workhorse for many refinishers and restoration professionals that like an easy to use clear that dries quickly to a deep glossy finish, buffs easily and holds up to the elements. Many professional painters today prefer a higher solids clear like our UC-210 HS Glamour clear. Being higher in solids our UC-210 clear delivers more clear per coat typically resulting in a deeper wet look. We also offer intercoat clear for application of effect solids, color blending, and fade outs.

**Clear starting at 34.94!\*\*\***

## Effect Solids

We also have a full range of special effect powders including mica pearls, xirallic pearls, glass pearls, metal flake, holographic flakes and more. Combining these specialty additives with our liquid paints and clears gives creative painters literally thousands of unique possibilities.

## Smokin' Deals!

### Car/Moto Kits

We've tried to make it as easy as possible to save big by bundling paints and required ancillary items into one kit for cars and motorcycles. Our car kits typically contain gallons of paint and clear with all needed activators and reducers which often will paint the outside of an entire average sized car.

Motorcycle or "Moto Kits" work off the same premise as the car kits only you get a quart of paint, quart of clear and all activators and reducers needed. Moto kits are commonly enough material for the average sized bike.

**Base/Clear kits starting at.....74.98\*\*\***

**Candy kits starting at .....120.91\*\*\***

**Chameleon kits starting at ...125.93\*\*\***
